About Florida Global University

Florida Global University is a U.S. academic institution headquartered in the city of Doral, Florida, United States of America. Since 2004, the university has been authorized to operate and offer its official academic programs by the Commission for Independent Education of the Florida Department of Education, the regulatory body for private education in the region and, by extension, within the United States. This authorization is legally held under License #3180, which empowers the university to confer official professional degrees at the Bachelor's, Master's, and Doctoral levels, recognized throughout the United States and worldwide.

OUR MISSION...

Your Future!

We are part of an Educational Group with over
+40 years of experience
in world-class private education.

Through our universities and academies, we have served approximately
200,000 students
worldwide.

FGU graduates are prepared to develop their careers in public and private organizations, thanks to the skills and knowledge acquired during their training.

Florida Global University (FGU) aims to support students in achieving their personal and professional goals through the educational programs it offers.

Doctorate Degree

A doctorate, also called a doctoral degree, is the highest academic level an individual can achieve in their field of study. This degree is awarded to professionals who have conducted original and substantial research, contributing significantly to the existing body of knowledge in their area.

Its benefits include:

- + Deepening of knowledge: It allows for a deeper and more advanced understanding of a specific field.
- + Professional opportunities: It opens doors to academic and research positions, as well as leadership roles in the industry.
- + Credibility and prestige: It grants high recognition and respect within the academic and professional community.
- + Skills development: It enhances critical skills such as analytical thinking, problem-solving, and project management.
- + Contribution to knowledge: It provides the opportunity to make significant contributions to your field, helping to advance research and development.

GENERAL OBJECTIVES OF THE CURRICULUM

Doctor of Business Administration in Entrepreneurship

This program offers a new way of understanding the concept of innovation, with the idea of "action" at its core. Aspiring innovators will learn how to transform their hunches into real-world solutions and identify organizations capable of implementing them. Discover through research the advantages of turning challenges into opportunities.

Students will also complete two sequences of courses, one dealing with existing research in the areas of entrepreneurship and innovation and a second dealing with research methodologies. Through these courses, students will develop a solid grounding in the entrepreneurship and innovation literature. In addition, students will develop the research skills needed to (1) identify compelling research questions, (2) use theory to identify possible answers to those research question, (3) frame research projects to explore the validity of those answers, and (4) analyze the data generated by that research project using the statistical tools and techniques necessary for publication in leading management journals.

This program offers a new way of understanding the concept of entrepreneurship, with the idea of action as its central axis. Furthermore, students will develop the research skills necessary to:

Identify compelling research questions.

Use theory to identify possible answers to research questions.

Frame research projects to validate those answers.

Analyze data generated by said research project using the necessary techniques and tools.

GRADUATE PROFILE

Those responsible for managing the field of entrepreneurship face a globalized world in continuous change, influenced by information and communication technologies. Therefore, the research function has a renewed role as a strategic and fundamental element for satisfying the needs of society worldwide.

For this reason, the Doctorate in Entrepreneurship aims for the graduate to acquire the following competencies.

KNOWLEDGE:

Information gathering to efficiently use sources of managerial knowledge regarding entrepreneurship.

The generation of new knowledge related to their field of specialization.

Skills

- 01

Generate scientific knowledge within the field of entrepreneurship (principles, process stages, and typologies).

- 02

Propose viable, relevant, and innovative alternatives (addressing managerial challenges and problem-solving).

- 03

Establish, lead, organize, and monitor research teams (within the entrepreneurship area).

- 04

Outline innovation and development projects.

- 05

Direct research and innovation projects (within a business or organizational scope related to entrepreneurship).

Attitudes

- 

Ethical conduct in the performance of their duties.

- 

Community service.

- 

Sensitivity toward the diverse range of business challenges regarding entrepreneurship.

- 

Leadership in coordinating workgroups.

- 

Social commitment and professional honesty.
- 

Attentiveness and responsibility toward their own self-improvement and professional development.

+ Additionally, it is considered desirable for graduates to possess attitudes of academic self-improvement, deepening of knowledge, social responsibility, collaboration, and tolerance; as well as values of honesty, solidarity, respect, and equity.

Admission Profile

In order to ensure student retention in the program and the achievement of the established objectives, the following admission profile is established.

Applicants seeking admission to the doctoral program must provide:

- A Master's degree awarded by a state-licensed or government-recognized U.S. university (or an equivalent degree from a university outside the U.S., duly legalized or apostilled).
- Official transcripts from the university where the Master's degree was conferred.
- A copy of a government-issued photo ID.
- An updated curriculum vitae (CV).
- Submission of a research protocol on a topic related to the doctoral program to which the candidate is applying.
- Submission of an updated resume/CV.
- A 2.5 x 3 cm front-facing photograph, with a white background and no eyeglasses.
- Proof of enrollment fee payment
